

10 Year Summary									
1993	1994	1995	1996	1997	1998	1999	2000	2001	2002
38,110	35,899	39,122	42,237	42,539	44,593	45,303	44,493	44,943	45,204

	Q1	Q2	Q3	Q4	Average
2002	46,341	46,941	47,438	46,541	46,817
2003	48,296	49,088	49,518	49,539	49,115

For the fourth quarter in a row, the non-sentenced ADP reached a record level (49,539 inmates). The yearly non-sentenced ADP for 2003 was about 2,300 inmates higher than for 2002, and over 13,000 inmates higher than ten years ago. Jail administrators have fewer options regarding alternatives to incarceration for non-sentenced inmates than for sentenced inmates. Therefore, during times when there is an artificial ceiling on the ADP, the proportion of non-sentenced inmates continually increases.
